

Tool system for winter road maintenance along railways

Front plough

Sturdy front plough based on long-standing experience from Mählers. For clearing snow along railway tracks.

Benefits of front plough:

- + Hydraulic controls
- + Double safety restraints
- + Fits various vehicle types
- + Replaceable wear-resistant cutting blades
- + Lockable wear soles

Side plough

A Mählers side plough combined with a front plough clears snow effectively.

Benefits of side plough:

- + Hydraulic controls, both for raising/lowering and for extending/contracting the telescopic cylinder
- + One safety restraint on each side
- + Fits various vehicle types
- + Replaceable wear-resistant cutting blades
- + Equipped with collision guard: a shock valve that makes the side plough fold back

Grader blade

Mählers is continuing to develop its popular grader blades for trucks.

Benefits of grader blade:

- + Low build-in dimensions
- + High ground clearance in folded position
- + Blade made of strong material
- + New mounting system eliminates the need for welding
- + The mounting is compatible with all frame heights

Snow sweeper

Snow sweeper for clearing snow from railway points and road crossings that cannot be accessed with other ploughs

Benefits of snow sweeper:

- + Hydraulic control of raising, lowering and swivelling motions
- + Screen with different settings to limit throw range
- + Replaceable nylon brushes
- + Four support legs for unloading and steady positioning
- + Fits various vehicle types
- + Safety restraints

Track cleaner

Track cleaner with extra drop-down cutter for clearing railway tracks

Benefits of track cleaner:

- + A safety restraint on the compressed air drive keeps it in the raised position when not in use
- + Extra drop-down cutter that reaches 80 mm below the upper edge of the rail
- + Steering integrated with the vehicle's mounting system
- + Replaceable wear-resistant cutting blades
- + Equipped with collision guard

TOOL SYSTEM FOR INCREASED PROFITABILITY
